

GEOGRAPHY

Geography

College of Social & Behavioral Sciences

Department of Geography

7 Armstrong Hall • 507-389-2617

Chair: Donald A. Friend

Cecil S. Keen, Ginger Schmid, Jose Javier Lopez, Cynthia A. Miller, Martin D. Mitchell, Forrest Wilkerson, Fei Yuan

Geography is both a social and natural science which seeks to understand the interactions of people with environment by studying the distributions across space and through time of all cultural and physical phenomena on our earth. Geography is divided into two main parts, human and physical. Human geography is directly concerned with people and their actions including culture and economies, whereas physical geography studies the natural resources and physical processes on or near the earth's surface. Both human and physical geography are explored together as an integrated whole in regional Geography. Cutting edge geospatial technologies enhance the study of people and environment and provide students with skills highly prized in the work force. The Department of Geography offers a full suite of courses in all areas, human, physical, and regional geography as well field techniques and geospatial technologies.

The majors, minor and Geographic Information Science certificate offered by the Department provide background and training that enable students to enter careers in the public or private sectors as well as prepare them for graduate study in Geography.

Admission to Major. Students enrolling in 300-400 level courses must be admitted to the program. Admission to major is granted by the department. Minimum university admission requirements are:

- a minimum of 32 earned semester credit hours.

- a minimum cumulative GPA of 2.00 ("C").

Contact the department for application procedures.

POLICIES/INFORMATION

GPA Policy. A GPA of 2.0 or higher in a major or minor in geography is required for graduation.

Refer to the College regarding required advising for students on academic probation.

Pass/No Credit Policy. P/N grading will be accepted in the major only for GEOG 401 and GEOG 497 and GEOG 409 at instructor discretion. All other courses must be taken for letter grades. All courses for a minor must be taken for letter grades.

GEOGRAPHY BA, BS

STANDARD MAJOR OPTION - 32 credits

Required for Major (Core, 14 credits)

GEOG 101 Introduction to Physical Geography (3)

GEOG 103 Introductory Cultural Geography (3)

GEOG 340 United States (3)

GEOG 370 Cartographic Techniques (4)

GEOG 401 Colloquium (1)

Required for Major (Electives, 18 credits)

Choose one cultural-systematic course from the following:

GEOG 425 Economic Geography (3)

GEOG 435 Urban Geography (3)

GEOG 437 Political Geography (3)

GEOG 438 Social Geography (3)

Choose one physical course from the following:

GEOG 217 Weather (3) **WITH OPTIONAL**

GEOG 218 Weather Lab (1)

GEOG 313 Natural Disasters (3)

GEOG 315 Geomorphology (3)

GEOG 410 Climatic Environments (3)

GEOG 420 Conservation of Natural Resources (3)

Choose one foreign regional course from the following:

GEOG 445 Latin America (3)

GEOG 450 Europe (3)

GEOG 454 Russian Realm (3)

GEOG 456 Africa (3)

GEOG 458 Geography of East Asia (3)

Choose one capstone experience from the following:

GEOG 440 Field Studies (1-4)

GEOG 480 Seminar (1-4)

GEOG 491 Senior Paper (1-4)

GEOG 497 Internship (1-10)

Choose additional electives (above 100 level): GEOG Electives

Required for Bachelor of Arts (BA) degree ONLY: Language (8)

Required Minor. Yes. Any.

PROFESSIONAL MAJOR OPTION

Required for Major (Core, 14 credits)

Same as for Standard Major.

Required for Major (Electives, 18 credits)

Same as for Standard Major.

Required for Major (Additional Electives, 16 credits)

Choose additional electives (above 100 level): GEOG Electives

Other Electives (6 credits may be taken outside department with department permission)

Required for Bachelor of Arts (BA) degree ONLY: Language (8)

Required Minor. None.

GEOGRAPHIC INFORMATION SCIENCE (GIS) CERTIFICATE (18-20 CREDITS)

Students will receive a fundamental knowledge and understanding of Geographic Information Systems (GIS) and Remote Sensing technologies with the option to focus more intensively on advanced GIS, Remote Sensing or Global Positioning Systems (GPS) principles and applications.

Required Core Courses (12 credits)

GEOG 373 Introductory GIS (4)

GEOG 473 Intermediate GIS (4)

GEOG 474 Introduction to Remote Sensing (4)

Required Elective Courses (Choose any **two** courses, 6-8 credits)

GEOG 439 Transportation Geog. (4)

GEOG 471 Digital Field Mapping with GPS (4)

GEOG 475 Advanced Remote Sensing (4)

GEOG 476 Spatial Statistics (3)

GEOG 478 Spatial Analysis (3)

GEOG 479 GIS Practicum (4)

GEOG 480 Seminar: Environmental Hazards (3)

GIS/PLANT SCIENCE BS

The GIS/Plant Science Degree encompasses the intersecting interests of agriculture, Geographic Information Systems (GIS), and Global Positioning Systems technologies along with advanced studies in soils ecology, plant physiology and diseases. The courses are designed to give an applied and advanced theoretical knowledge of these subjects, which are fast becoming critical in sustaining a viable agricultural economy. This program is offered in partnership with Minnesota West Community College. Students should contact the Department of Geography for information regarding admission to this program.

GEOGRAPHY

Core (27 credits to be taken at Minnesota West Community College):

Chemistry 2101 (5); Biology 2230 (4); Geography 1100 (3); and Agriculture 1102 (3), 1103 (3), 2202 (3), 2203 (3), and 2212 (3)

36 credits to be taken at Minnesota State Mankato

BIOL 412	Soil Ecology (4)
BIOL 440	Horticulture (4)
BIOL 441	Plant Physiology (4)
BIOL 443	Plant Ecology (4)
BIOL 445	Economic Botany (4)
ENVR 440	Environmental Regulations (3)
GEOG 101	Introductory to Physical Geography (3)
GEOG 370	Cartographic Techniques (4)
GEOG 373	Introduction to Geographic Information Systems (4)
GEOG 420	Conservation of Natural Resources (3)
GEOG 471	Digital Field Mapping with GPS (4)
GEOG 473	Intermediate GIS (4)

Required Minor: None

GEOGRAPHY MINOR (18 credits)

Required for Minor (Core, 9 credits)

GEOG 101	Introduction to Physical Geography (3)
GEOG 103	Introductory Cultural Geography (3)
GEOG 340	United States (3)

Required for Minor (Electives, 9 credits, above 100 level)

GEOG	Electives
------	-----------

COURSE DESCRIPTIONS

GEOG 100 (3) Elements of Geography

An introduction to Geography and its themes of study. The course will familiarize students with where places are located in the world together with their cultural and physical features. Students will be tasked to think critically and diversely about various cultures and features of the modern world.

Fall, Spring

Diverse Cultures - Purple

GE-8, GE-10

GEOG 101 (3) Introduction to Physical Geography

Survey of the processes and features of the earth's physical environment, earth-sun relationships, weather, climate, natural vegetation, soil, and landforms. Examines their interrelations and spatial distribution using North America and world-wide examples. Some coverage of human-environmental relations.

Fall, Spring

GE-3, GE-10

GEOG 103 (3) Introductory Cultural Geography

Cultural aspects of interactions between people and their environment focusing on spatial patterns of population, agriculture, politics, language, religion, industrialization, and urbanization. Emphasis is placed on the processes that create the cultural landscape and on management of land and natural resources.

Fall, Spring

Diverse Cultures - Purple

GE-5, GE-8

GEOG 210W (3) Landscapes and Places

Introduction to the concepts of landscape and place in a variety of geographical writings. Emphasizes works with strong regional overtones. The interaction between the physical and cultural environments is paramount. Field observation and integrating imagery into original student writing documents is also addressed.

GE-1C, GE-10

GEOG 217 (3) Weather

An examination of the processes involved in weather formation. Students will be introduced to weather map analysis, simple forecasting and observational techniques, and weather instruments.

Fall, Spring

GEOG 218 (1) Weather Laboratory

Covers applied aspects of weather, including understanding weather codes, analysis and interpretation of weather maps, basic techniques of forecasting, and familiarity with weather instruments.

Fall, Spring

GEOG 299 (1-3) Individual Study

An assignment that is tailored to individual needs of a student. The instructor and the student arrange the type of project for the student, such as a term paper, readings, mapping, field investigation, or computer cartography.

Pre: Consent

Fall, Spring

GEOG 313 (3) Natural Disasters

An examination of the underlying causes of natural disasters occurring over the globe. Focus will be primarily upon weather and climate related disasters. Students will also be exposed to concepts of plate tectonics and how these affect the distribution of earthquakes and volcanism over the planet.

Variable

GEOG 315 (3) Geomorphology

Covers elements of the structure of the earth and the variety of landforms found on the earth's surface, with emphasis upon the processes, both past and present, that act upon the surface to create the landforms now visible. Local field trips.

Fall

GEOG 340 (3) United States

Students will develop a knowledge of the similarities and contrasts in regional landscapes and cultures of the United States.

Fall, Spring

GEOG 341 (3) World Regional Geography

Differences and similarities in the cultural and natural environments by the world's major regions. Useful survey of world geography for educators and international relations students.

Fall, Spring

GEOG 342 (3) Geography of Minnesota

The course involves the natural and human environments of Minnesota. The physical resources, population history, and current issues are emphasized.

Spring

GEOG 370 (4) Cartographic Techniques

The lecture material addresses map projections, technology changes in production, basic analysis and depiction of quantitative point, line and areal data. Also, the evaluation of maps and the history of cartography from a European, Oriental, and American Indian perspective is discussed. All maps are drawn using computer assistance.

Fall, Spring

GEOG 373 (4) Introduction to Geographic Information Systems

The course will be an introduction to the analysis of spatial data using the concept of a geographic information system (GIS). Content of the course will be, to a great extent, based on the NCGIA core curriculum with assignments tailored to the data and software available within the department such as ArcGIS.

Pre: GEOG 370

Fall, Spring

GEOG 401 (1) Colloquium

Overview of geographic work, interests, and research by guest speakers.

Fall

GEOG 409 (1-4) Selected Topics

The instructor will develop a specific course on a geographic topic, such as soils, landforms, water resources, energy, housing, population geography, or some other topic for the class.

Fall, Spring

GEOGRAPHY

GEOG 410 (3) Climatic Environments

The characteristics of particular climates and understanding the factors that control their spatial distribution.

Pre: GEOG 101, or consent

Fall

GEOG 412 (4) Advanced Weather

Meteorological principles and theory are applied to the analysis and interpretation of weather data in order to better understand the structure and evolution of synoptic-scale weather systems. Basic knowledge of mathematics will be assumed.

Pre: GEOG 217

ALT-Fall

GEOG 414 (3) Biogeography

Analyzes the distribution and concentration of plants and animals throughout the world. Emphasis is placed on the role of evolution, tectonics, and physical barriers to the distribution and migration of species. Special emphasis is placed on the role of humans in the modern redistribution of species.

Fall

GEOG 420 (3) Conservation of Natural Resources

Survey of natural resources emphasizing energy, minerals, soils, fisheries, and water resources. Also addresses timber, wetlands, and wildlife on public and private lands.

Spring

GEOG 425 (3) Economic Geography

Examines national and international economic geographical order and trade activities. Topics include economic development, competition, international trade, and impacts on the environment and people.

GEOG 430 (3) Historical Geography of the United States

The evolving patterns of settlement, cultures, landscapes, and economies of the United States from the colonial period to 1990. An introduction to historical geography as a sub field of geography, including career opportunities in related professions.

On Demand

GEOG 435 (3) Urban Geography

Hypotheses and generalization related to urban functions, structure, land use, distribution, growth, and sometimes decline. Emphasis will be mostly on the United States' urban places.

Fall

GEOG 436 (2) Rural Development

Introduction to theoretical frameworks for analyzing processes of economic, environmental, and social change in rural regions. Includes basic and advanced geographical principles and techniques for studying non-urban areas. Designed to equip students with the knowledge and skills necessary for carrying out research projects on rural environments.

Spring

GEOG 437 (3) Political Geography

Spatial problems and structure of governments, focusing on countries of the world and their geographic internal order. Covers such topics as boundary problems, strategic locations, and geopolitical explanations of international and internal relations and conflicts.

Spring

GEOG 438 (3) Social Geography

Concepts and theories concerning global and national social problems and the significance of geographic analytic methods for social research. Study of factors related to variations in regional standards of living.

Fall

GEOG 439 (4) Transportation Geography

Four major sets of ideas will be covered: Introduction to Spatial Organization, Network Analysis, Allocation Methods, and Urban Transportation. The emphasis is on these approaches to understanding the geography of transport by description, explanation, and normative or optimal methods.

Fall

GEOG 440 (1-4) Field Studies

Various excursions to study physical and cultural landscapes inside and outside of Minnesota.

Variable

GEOG 445 (3) Latin America

Regional geography covering the ecological and human environment of Middle and South America, including the Caribbean. Students can pick specific topics to study in detail. The geographic relations between the USA and Latin America are also covered.

Fall

GEOG 446 (3) Canada

Students will develop a knowledge of the environmental, cultural, historical, and economic geographies of Canada. Readings of bestselling fiction and scholarly works written by Canadians will provide a Canadian perspective on the nation's past, present, and future.

ALT-Fall

GEOG 450 (3) Europe

Cultural, environmental, and economic background of Europe west of Russia and Ukraine. Following a general geographic survey, the course will cover major regions and countries.

Spring

GEOG 454 (3) Russian Realm

Survey of the area of Russia and her neighbors. Examines regional patterns of the physical environment, natural resources, population distribution, cities, and economic activity. Relates people to the land.

Variable

GEOG 456 (3) Africa

A survey of the physical and cultural resources and economic development of the continent with emphasis on current issues. Topics discussed will focus on Africa south of the Sahara.

Variable

GEOG 458 (3) Geography of East Asia

Examines the physical and human environments of eastern Asia, mainly China, Korea and Japan. The class will be assisted by visual sources and hands-on use of primary documents.

Variable

GEOG 460 (3) Geography Teaching Methods

The course will cover resource materials and current techniques in classroom teaching.

Variable

GEOG 464 (4) Teaching Earth Science

An applied course tailored to meet practical needs of a teacher, related to curriculum development and earth science lab equipment and supplies.

Variable

GEOG 471 (4) Digital Field Mapping with GPS

This course covers the basic strategies for field mapping using data acquired from global positioning systems (GPS).

Pre: GEOG 373 or equivalent

Fall

GEOGRAPHY

GEOG 473 (4) Intermediate GIS

Comprehensive examination of computer-assisted systems for manipulation and analysis of spatially-referenced data, including data structure and organization, input and output problems, data management, and strategies for analytical work.
Pre: GEOG 373

Spring

GEOG 474 (4) Introduction to Remote Sensing

This is an introductory course on theories and techniques of remote sensing. Focus will be placed on providing students with a general overview of the application of remote sensing to practical problems, and hands-on experience for image processing and analysis.

Fall

GEOG 475 (4) Advanced Remote Sensing

This course provides students the opportunity to develop further knowledge of remote sensing. Emphasis will be placed on introducing advanced theories and techniques for digital image processing and helping students obtain independent research skills using remote sensing data.

Pre: GEOG 373, GEOG 474

Spring

GEOG 476 (3) Spatial Statistics

Descriptive statistics, probability, hypothesis testing, introduction to non-parametric statistics, correlation, introduction to regression analysis, spatial statistics, and principles of data representation in graphs and tables.

Spring

GEOG 477 (1-3) Topics in Techniques

This offering will include a variety of selected technical topics in geography, including but not necessarily limited to manual cartographic drafting and negative scribing, photomechanical techniques in production cartography, aerial photo interpretation, and advanced coverage of digital analysis of satellite-derived remote sensor data and global positioning systems.

Pre: Consent

Variable

GEOG 478 (3) Spatial Analysis

Introduction to theoretical frameworks for spatial analysis and geographic quantitative methods. Includes basic and advanced geographic principles and techniques for studying spatial patterns. Designed to equip students with the skills necessary to carry out research projects that demand advanced statistics.

GEOG 479 (1-4) GIS Practicum

This offering will include supervised project work in raster-based and/or vector-based GIS, using problems and data drawn from local or regional agencies or other professional-level organizations with whom the Geography Department maintains a relationship. Students must have completed one of the prerequisite courses, or professional-level experience.

Pre: GEOG 373 or GEOG 473, or consent

Variable

GEOG 480 (1-4) Seminar

Topics vary in physical, cultural, economic, political, and historical geography, as well as environmental conservation and geographic techniques.

Variable

GEOG 491 (1-4) Senior Paper

Fall, Spring

GEOG 497 (1-10) Internship

An applied work and learning experience. The student will provide a written internship report on professional practicum and the work supervisor will be consulted on how much the student has accomplished.

Pre: Consent

On Demand

GEOG 499 (1-3) Individual Study

An assignment that is tailored to individual needs of a student. An arrangement is made that the student works on a project (term paper, readings, mapping, field investigation, GIS, or related topics).

Pre: Consent

On Demand
